Hiring Manager

Texas Instruments
Bengaluru, Karnataka, India

Subject: Application for Embedded Software Engineer Internship

Respected Hiring Manager,

I am very excited to apply for the Embedded Software Engineer Internship at Texas Instruments. As an **electrical engineering student interested about low-level programming and embedded systems**, I am eager to apply my skills and learn from TI's top-notch embedded processing innovations.

Having a strong foundation in **Assembly, C, and Python** that I polished recently, it enables me to write efficient, low-level code for embedded systems. I am particularly fascinated by TI's work in **analog and embedded processing**, and hope to gain hands-on experience with your **MSP430, C2000, and Sitara** processors. I was also enamoured by the **aerospace products** that you have made.

Beyond programming, I have a keen interest in **system-level debugging, performance optimization, and firmware development**. I am eager to apply my problem-solving skills to real-world challenges and collaborate with engineers at TI to develop **high-performance embedded solutions**.

I would welcome the opportunity to discuss how my technical background aligns with this internship. Thank you for your time and consideration and looking forward to your response.

Best regards,

Adithya Asok
